

STATEMENT OF QUALITY POLICY

Subsea Riser Products (SRP) provides design and supply of specialist offshore products to the oil and gas industries. Our quality management system is based on continual improvement to ensure our product from concept through to supply and any installation and post-installation support and advice is fit for purpose and meets the stringent specifications expected.

The nature of our business coupled with our Client's needs for ultra reliability, safety and product longevity results in a high focus on the expertise and experience of our designers and best practice project management. We are uniquely placed to understand our Client's requirements as a specialist within the ACTEON group of companies.

To achieve our objectives continuing education and development of staff is of prime importance. The directors of the company set SMART objectives and regularly review performance and progress on all projects. The Quality Management System used at SRP meets the requirements of ISO 9001:2008 and relevant regulatory and statutory requirements.
